Fundstrat—a contrarian approach to strategy

- Fundstrat is an independent research firm established in 2014, with clients in over 16 countries and count as current institutional clients the top asset managers, hedge funds and private banks, representing ~80% of globally managed equity assets.
- Our macro strategy team produces primary research along seven product verticals: (i) Portfolio Strategy, (ii) Digital Assets; (iii) Quantitative Strategy; (iv) Global Portfolio and Asset Allocation Strategy, (v) Technical Strategy, (vi) Quantamental, (vii) Washington Policy, and (viii) Market Intelligence.
- Our Quantitative and Crypto Indices (managed by Ken Xuan) are widely followed by Fundstrat clients.
- The research team has over 100 combined years of institutional sell-side research experience and three of the four sector heads were formerly in this role at J.P. Morgan.

Fundstrat leverages global partnerships

We have partnered with MOGO to distribute our crypto product throughout Canada.

We are the “white label” research provider of US research for SMBC Nikko, which has over 2 million brokerage accounts.

We have partnered with MaiCoin to translate our crypto product to Chinese and distribute it throughout Taiwan.

We have partnered with Squarepoint Capital to sell our US institutional research to European asset managers.

We have partnered with Eminence Investment to sell our US institutional research to asset managers in Saudi Arabia.

Exploring JV with Taiwan investment bank to translate our macro research and crypto product into Chinese to sell to Chinese institutions and retail

Partnering with XP Securities to sell our institutional research in LatAm. And we are finalizing JV to jointly sell crypto/blockchain to retail

We have partnered with MST Financial to distribute the market research by both Fundstrat and FSInsight to clients and subscribers in Australia and New Zealand.

Clients should "concentrate" relationships

From Byron Wien
Vice Chairman Blackstone

"My performance improved once I began to use fewer research providers and use them more intensely."

More clients seeking Portfolio Strategy

From Third Point's 3Q16 Quarterly Letter
Author: Daniel Loeb.

Nearly one year into this market cycle, a few truths of hedge fund investing are evident: 1) portfolio positioning matters as much as stock picking skill; 2) factor risk, not beta, has driven hedge fund underperformance in an up market; 3) crowded trades are a symptom of the prevalence of copycat investment frameworks practiced by hundreds of funds formed over the past decade to mimic the success of many of their investing legend mentors and therefore naturally share the same outlooks and biases; and 4) putting money to work in equities and credit today requires a thoughtful perspective on global events. Macro analysis is no longer just for macro traders.

Be "non-consensus"

General Principles

An integrated research process with a proven track record...

- 1. Credit lead equities** Stocks “junior” piece of capital structure
- 2. Regimes supersede business cycles** Regimes drive multi-year, multi-decade cycles which need to be overlaid to biz cycle dynamics
- 3. Investors too reliant on “last cycle” factors** Today’s Portfolio Manager has a median tenure of 7 years—meaning he has only seen one cycle.
- 4. Consensus lags (not leads)** Consensus tools and indicators are already discounted by markets and computers.
- 5. “Signal” from Noise** We look for 1, 2, 3-sigma signals to identify quantifiable investment opportunities.

Fundstrat Blockchain Research Capabilities

- Fundstrat is widely recognized as the only institutional research firm providing comprehensive market analysis and price analytics for crypto-currencies and blockchain technology.
- We have already established leadership in this space—in just the past year (since launching crypto-currency research), **we count >10% of all crypto-funds, representing ~33% of crypto AUM as our paying clients. We are effectively the only paid research subscription service in crypto with widespread adoption.**
- Thomas J Lee, head of overall strategy for crypto-currencies, is widely followed by both institutional investors, individual investors and the media. Our work is often widely quoted and cited in social media, traditional media channels and on television/cable networks.

Our crypto-currency research products include the following:

- A proprietary valuation framework for the valuation of Bitcoin and major crypto-currencies.
- Fundstrat launched 5 crypto-currency indices last year. New products include:
 - ✓ Volatility-adjusted crypto-indices (beyond cap-weighting)
 - ✓ Launch of qualitative indices including: privacy tokens; general platform tokens; exchange tokens and digital currencies.
- A proprietary Bitcoin Misery Index to measure the Bitcoin holder's satisfaction with investing.
- Crypto-currency and Bitcoin mining and security model;
- Additionally, we provide bespoke quantitative research analytics for our crypto-currency clients, including portfolio optimization and risk-weighting.
